READY

2/2 PRIORITY GROUPS

DECISION IN ONE MINUTE

High-confidence candidate: advance to bid qualification, then verify controlling files before pricing.

WHY IT SURFACED

- The public filing is inside the fictional provider's selected Vernon County footprint.
- The requested dedicated internet services align with the fictional provider's selected service categories.
- The filing was open with seven days remaining on the fixed sample snapshot date.

WHAT CAN STOP IT

- Confirm each access, transport, and internet bandwidth-including symmetry and burstability-against engineering capacity.
- Reconcile every site and endpoint against the controlling location schedule and the provider footprint.
- Map each source circuit row to endpoints, handoff, routing, capacity, and a build/no-build decision.

FIRST 48 HOURS**01****COMPLIANCE / NOW**

Immediately before any response to RHC46100022711, reopen the official posting and every applicant attachment, verify versions and dates, and retain proof of the submitted files and receipt.

02**BID OPERATIONS / NOW**

For RHC46100022711, verify the official deadline of 2026-08-19, its time zone, the applicant-specific due time, and the proof-of-receipt process.

03**COMMERCIAL / NOW**

For RHC46100022711, capture required quote fields, evaluation weights, minimum criteria, disqualifiers, base term, extensions, and all recurring and one-time charge treatment.

QUALIFICATION MATRIX

The evidence behind the recommendation

High-confidence candidate / 82 provider fit

Provider fit is evaluated separately from deadline urgency and source-evidence quality. It is not a win probability or serviceability determination.

APPLICATION

RHC46100022711

PROGRAM / FUNDING YEAR

Healthcare Connect Fund / FY2027

LOCATION

Nevada, Vernon County, MO

REQUESTED SERVICE

Dedicated internet access and enterprise internet access

POSTING DATE

Jul 22, 2026

RESPONSE DEADLINE

Aug 19, 2026

ALLOWABLE SELECTION DATE

Aug 20, 2026

CONTRACT PERIOD

Three-year and month-to-month pricing fields; verify every option in the official files

PARTICIPATING STATES

MO

RFP

Not indicated

CRITERION	PROVIDER CRITERIA	OFFICIAL EVIDENCE	ASSESSMENT
Territory	Confirm network serviceability at every requested site; a geographic screen is not a serviceability determination.	The official posting identifies the filing location as Nevada, Vernon County County, MO. / Official record site_state, site_county, site_city, participating_site_locatio [S1]	ALIGNED
Service	Confirm that the provider portfolio and underlying facilities satisfy every requested service row.	Official documents identify Dedicated Internet Access. / Document-level citation; no page locator available [S3]	ALIGNED
Bandwidth	Confirm each access, transport, and internet bandwidth-including symmetry and burstability-against engineering capacity.	The reviewed sources state bandwidth values of 50-5000 Mbps, 1000 Mbps, 50 Mbps, 2000 Mbps, 5000 Mbps. / Document-level citation; no page locator available [S3]	REVIEW
Sites	Reconcile every site and endpoint against the controlling location schedule and the provider footprint.	Extracted counts: 1 filing, 1 participating, 1 service location, and 5 circuit endpoint entries. / Document-level citation; no page locator available [S1]	REVIEW

Circuits	Map each source circuit row to endpoints, handoff, routing, capacity, and a build/no-build decision.	5 structured circuit requirements were extracted: Resiliency requirement; Bandwidth requirement. / Document-level citation; no page locator available [S3]	REVIEW
Diversity	Have engineering verify physical path, carrier, entrance-facility, and failure-domain diversity where required.	3 diversity or resiliency requirements were identified. / Document-level citation; no page locator available [S3]	REVIEW
Contract term	Confirm base term, extensions, month-to-month treatment, renewal language, and pricing for each allowed option.	Extracted term options: range 36-60 months. / Document-level citation; no page locator available [S2]	REVIEW
Service levels	Confirm uptime, latency, packet loss, repair targets, monitoring, escalation, credits, and support hours.	The reviewed material did not state a supported SLA, latency, repair, uptime, or support requirement.	REVIEW
Construction and installation	Confirm surveys, permits, make-ready, construction ownership, demarcation, one-time charges, and completion dates.	The reviewed material did not state a supported construction or installation requirement.	REVIEW
Pricing	Review every pricing template and separate recurring, non-recurring, construction, tax, and alternative charges as instructed.	1 explicit pricing-template or quote-format requirement was identified. / Document-level citation; no page locator available [S2]	REVIEW
Evaluation	Extract the complete evaluation model, mandatory minimums, disqualifiers, and tie-breaking rules from the controlling sources.	The reviewed material did not state a supported evaluation or disqualification requirement.	REVIEW
Required forms	Inventory the controlling FCC form, applicant forms, workbooks, certifications, addenda, and required response files.	1 official form document is represented, but response-form requirements remain unclear. / Document-level citation; no page locator available [S1]	REVIEW

Evidence completeness / Strong

13 of 14 qualification dimensions analyzed; 8 confirmed by the supplied evidence or an explicit assessment. Analyzed 3 of 3 retained documents; 0 unsupported. Missing or unsupported files remain explicit review gates.

REVIEW EXTRACTED SCOPE

PRIVACY-SAFE OFFICIAL FEED SUMMARY

Service categories named Dedicated internet access
ALLOWLISTED FEED FACT

Bandwidth mentions 50 Mbps / 5 Gbps
NORMALIZED QUANTITY

Bounded quantity mentions 5 circuits
NORMALIZED QUANTITY

Constructed only from fixed service labels and bounded numeric values. The feed's free-text description, names, addresses, and contact details are not reproduced.

Normalized from the official documents linked below. Confidence describes extraction clarity, not serviceability or bid compliance. Repeated privacy-safe source notes are consolidated here for faster review.

REQUESTED SERVICES

Dedicated Internet Access	50-5000 Mbps / 50 Mbps upload / 5 lines / Similar-service policy not stated [S3]
HIGH CONFIDENCE	

SITE ROLES

Extracted counts	1 filing site / 1 participating site / 1 explicit service location / 5 circuit endpoints [S1]
HIGH CONFIDENCE	

Counts may overlap. A filing or participating site is not automatically a requested service location or circuit endpoint.

CONTRACT TERMS

36-60 months	Extension policy not stated / Month-to-month accepted [S2]
MEDIUM CONFIDENCE	

CIRCUIT REQUIREMENTS

Circuit 1	Resiliency / 1000 Mbps - Resiliency requirement [S3]
HIGH CONFIDENCE	

Circuit 2	Resiliency / 50 Mbps - Resiliency requirement [S3]
HIGH CONFIDENCE	

Circuit 3	Resiliency / 1000 Mbps - Resiliency requirement [S3]
HIGH CONFIDENCE	

Circuit 4	Bandwidth / 2000 Mbps - Bandwidth requirement [S3]
HIGH CONFIDENCE	

Circuit 5	Bandwidth / 5000 Mbps - Bandwidth requirement [S3]
HIGH CONFIDENCE	

PROCUREMENT AND RESPONSE RULES

Pricing Template	Pricing template requirement / Mandatory [S2]
HIGH CONFIDENCE	

BID STRATEGY

Turn the evidence into an owned review plan

Assign owners before pricing. Evaluation and submission details below are source-backed only when a citation appears; otherwise they remain explicit review gates.

EVALUATION CRITERIA

Not normalized in this snapshot

Confirm price weighting, non-price criteria, minimum requirements, tie-breakers, and every disqualifier in the controlling filing.

SUBMISSION CHECKLIST

Inventory the controlling FCC form, applicant forms, workbooks, certifications, addenda, and required response files. [S1]

Confirm the exact submission method, deadline and time zone, file formats, naming rules, recipient, and proof-of-receipt process.

Check the official posting again immediately before submission for new or replaced documents.

OPEN QUESTIONS AND EXPLICIT UNKNOWNNS

- Confirm each access, transport, and internet bandwidth-including symmetry and burstability-against engineering capacity.
- Reconcile every site and endpoint against the controlling location schedule and the provider footprint.
- Map each source circuit row to endpoints, handoff, routing, capacity, and a build/no-build decision.
- Have engineering verify physical path, carrier, entrance-facility, and failure-domain diversity where required.
- Confirm base term, extensions, month-to-month treatment, renewal language, and pricing for each allowed option.
- Confirm uptime, latency, packet loss, repair targets, monitoring, escalation, credits, and support hours.
- Confirm surveys, permits, make-ready, construction ownership, demarcation, one-time charges, and completion dates.
- Review every pricing template and separate recurring, non-recurring, construction, tax, and alternative charges as instructed.
- Extract the complete evaluation model, mandatory minimums, disqualifiers, and tie-breaking rules from the controlling sources.
- Inventory the controlling FCC form, applicant forms, workbooks, certifications, addenda, and required response files.
- Confirm the exact submission method, deadline and time zone, file formats, naming rules, recipient, and proof-of-receipt process.
- Check the official posting again immediately before submission for new or replaced documents.

ACTION PLAN

The next decisions, in working order

01	COMPLIANCE / NOW	Immediately before any response to RHC46100022711, reopen the official posting and every applicant attachment, verify versions and dates, and retain proof of the submitted files and receipt.	
02	BID OPERATIONS / NOW	For RHC46100022711, verify the official deadline of 2026-08-19, its time zone, the applicant-specific due time, and the proof-of-receipt process.	Aug 19, 2026
03	COMMERCIAL / NOW	For RHC46100022711, capture required quote fields, evaluation weights, minimum criteria, disqualifiers, base term, extensions, and all recurring and one-time charge treatment.	
04	NETWORK ENGINEERING / NOW	Build a row-level feasibility sheet for RHC46100022711 covering endpoints, bandwidth, handoff, routing, diversity, SLA, construction, lead time, and exceptions.	
05	BID OPERATIONS / NOW	Inventory every required form and attachment for RHC46100022711, then record the submission channel, file format, naming convention, recipient, deadline, and receipt evidence.	Aug 19, 2026

Decision boundary

Fit is territory and service alignment, not win probability. BidTerrain does not determine serviceability, eligibility, compliance, expected price, award probability, or revenue.
